## PROFESSIONAL SUMMARY

Final-year Computer Science engineer at VIT-AP (CGPA 9.18, Dept. Rank 9th) with hands-on experience building production-grade web applications and AI-powered systems. Delivered full-stack features using React, TypeScript, Python, and FastAPI in a live product environment. Independently designed end-to-end pipelines spanning NLP, RAG-based vector search, and autonomous QA automation. Comfortable owning feature development from API design to responsive UI in Agile, sprint-driven teams.

## TECHNICAL SKILLS

**Languages:** Python, Java, C, C++, R

**Frontend:** React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Node.js

**Backend:** Flask, FastAPI, REST APIs

**AI / ML:** Sentence Transformers, FAISS, RAG Pipelines, Scikit-learn, NumPy, Pandas

**Databases:** MySQL, ANSI SQL

**Tools & Platforms:** Git, GitHub, Selenium, Streamlit, Agile/Scrum

## WORK EXPERIENCE

**Frontend Developer Intern** | [PearlThoughts](#) *Tamil Nadu, Remote | July 2025 – August 2025*

- Engineered responsive, accessible UI components for Schedula v2.0, a live doctor-appointment scheduling platform, using React, TypeScript, and Tailwind CSS.
- Delivered core product features including doctor discovery, appointment booking, patient profile management, and real-time chat — improving end-to-end user workflow.
- Operated within an Agile sprint cycle with daily stand-ups and cross-functional planning, consistently shipping features on schedule across a 1-month engagement.

## PROJECTS

**Autonomous QA Agent** | *Python, FastAPI, Selenium, FAISS, RAG Pipeline, Sentence-BERT, Pandas*

- Designed a RAG-based autonomous QA agent using FastAPI and FAISS vector search to auto-generate structured Selenium test cases from uploaded requirement documents, reducing manual test-writing effort.
- Built a Streamlit interface supporting document ingestion, knowledge-base creation, and exportable CSV/JSON outputs, enabling end-to-end QA automation workflows.

**Resume Screening Assistant** | *Python, Flask, Sentence Transformers, PyMuPDF, pdfplumber, pytesseract, python-docx, fuzzywuzzy, Pandas, Chart.js, Bootstrap 5*

- Built a full-stack AI resume classifier using Flask and the all-mpnet-base-v2 Sentence Transformer model, achieving 88–92% classification accuracy across 20 job roles by combining semantic similarity (60%), keyword coverage (30%), and alias detection (10%).
- Implemented a multi-stage document ingestion pipeline supporting text-based PDFs (pdfplumber), scanned/image PDFs (PyMuPDF + pytesseract OCR), DOCX, and legacy DOC formats — enabling broad resume format compatibility.
- Delivered end-to-end product features including confidence scoring, top-3 role matching, role distribution bar charts (Chart.js), and one-click CSV export — making results immediately actionable for hiring workflows.

**AI-Based Recipe Generator** | *Flask, HTML, CSS, JavaScript, Gemini API*

- Developed an NLP-driven recipe generation system integrated with Google Gemini API, processing natural language user inputs to return structured, context-aware recommendations.
- Architected a full-stack pipeline connecting a Flask backend with a JavaScript frontend, enabling real-time API response handling and personalized output delivery.

## EDUCATION

---

**Vellore Institute of Technology (VIT-AP)**

*Amaravati, AP | Nov 2022 – Jun 2026*

B.Tech, Computer Science and Business Systems

CGPA: 9.18 | Departmental Rank: 9th in CS & Business Systems (2024–25)

**Sasi Jr College**

*Tadepalligudem, AP | Jul 2020 – Jul 2022*

MPC — 12th Grade (98.1%)

Board of Secondary Education

**St. Xavier E.M School**

*Ibrahimpattanam, AP | Jun 2019 – Jun 2020*

Class X (99.66%)

Secondary Education

## CERTIFICATIONS

---

- Generative AI Using IBM Watsonx — IBM Career Education Program
- Professional Certificate in Project and Process Management — Udemy
- Career Essentials in Software Development — Microsoft & LinkedIn
- Programming Essentials in C++ (CPA) — Cisco Networking Academy
